

QUORION

Data Systems GmbH

QMP

ONE FOR ALL. ALL FOR ONE.

Speed, versatility, and customization are the key elements in the design of the **QMP** series. The new operating software allows operators to completely adapt all programming features to meet any retail and hospitality demands.

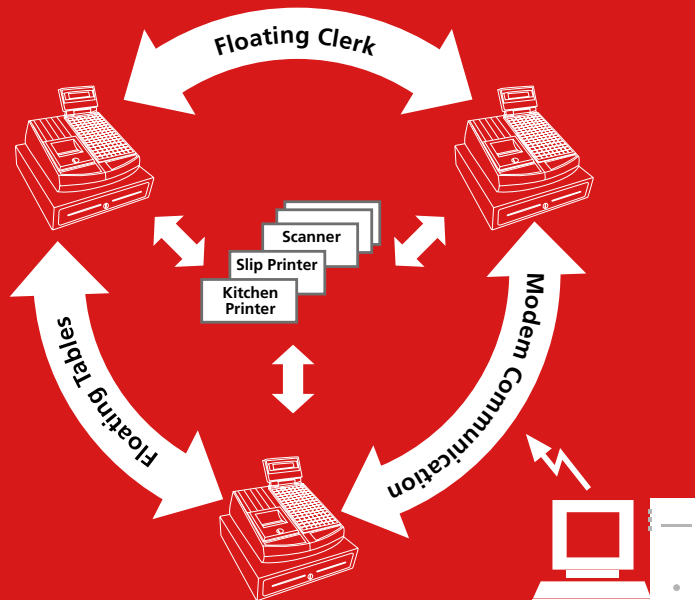

Coupled with our reliable and advanced hardware platform, the **QMP** 3000 series represents **the** next step in retail and hospitality management.

...designed to succeed

QMP

Network. All for One.

The **QMP** series provides an IRC network with floating waiters and tables. Consequently, vendors can now take advantage of the inherent scalability our network offers, because multiple cash registers can share one set of peripheral devices.

- RS 485, Up to 24 ECR's (depending on parallel data transfer)
- Floating Clerks & Balances
- Printer Sharing
- Reporting & Programming

Floating Tables/Balances

**1****2**

Automatic transfer of sales data to all ECRs in the network, as customer moves to different locations such as table, bar, or terrace.

Floating Clerks

**1****2**

Automatic clerk change and transfer of all active sales data per customer at any ECR in the network.

Configurable Reports

- Up to 4 Periods
- Individual Clerk Reports
- Individual Sales Person Reports
- Time & Date Zone Reports

Keyboard Levels

- Up to 8 Keyboard Levels
- Automatic Selection by Clock

Clerk Options

- Up to 999 Clerks
- Secret & Sign On Code
- Time Report
- Clerk Interrupt System (Bakery)

Configurable File Layout and Sizes

	Standard	Maximum*
● Articles	700	up to 50,000
● Departments	50	up to 999
● Groups	25	up to 99
● Tax / VAT	4	up to 8
● Clerks	8	up to 999
● Foreign Currencies	4	up to 99
● Tendering Functions	8	up to 99
● Paid Out and Received on Account	4	up to 99
● Discounts	4	up to 99
● Electronic Journal	15,000	up to 1,000,000 lines

Balance Systems

	Standard	Maximum*
● Number of Tables	100	up to 10,000
● Number of Rooms	0	up to 10,000
● Number of Accounts	0	up to 10,000
● Detailed Balance Invoice	-	-

* Maximum settings are subject to memory limitations

QMP

Software. One for All.

Quorion's Multi-Purpose software now makes it possible to configure your cash register according to your needs. The **QMP** cash register can therefore function universally in retail, hospitality, and hotel systems. Our integrated memory calculator lets you easily follow available memory to monitor your ECR's performance and storage capacity.

File Type	Records	Record Size	Memory Required
Total Sales	1	2570	2570
Groups	10	86	860
Departments	50	92	4600
PLU	100	118	11800
Tax	8	49	392
Clerks	15	18	270
Sales Persons	5	18	90
Tenders	8	39	312
Drawer Totals	8	37	296
P.O. P.A.	4	39	152
Discounts	4	45	180
Connectors	6	36	216
Currencies	4	44	176
User Reports	10	124	1240
Balance Functions	6	36	216
Table Totals	100	36	3600

Memory Required: 18940 (1894)

Configurable Reports

Managers can track multiple store locations via the extensive reporting features the **QMP** software offers. Combined with our superb IRC capability, you can call up all the required information at the click of a button. Even the report contents are completely modifiable. You can finally examine the data that is most essential to your business.

Item	Quantity	Amount	Tax	Cost
Total Sales	27	557.26	8.86	4.47
Group 1	27	557.26	8.86	4.47
